

SITE: AFC Wimbledon

CUSTOMER: Pryer Construction

PRODUCTS: Terrace Units

Carter Concrete recently completed the design, manufacture and installation of terrace units for the Kingsmeade Stadium for AFC Wimbledon.

Using our experience of designing and manufacturing these units we were able to provide a successful installation that was well received.

Carter Concrete have previously supplied precast products for other clubs such as Norwich City and Chelsea.

Terrace units come complete with lifting sockets and are of a quality finish manufactured in line with our British Standard accreditation.

Our ability to be bespoke to meet customer requirements is a major benefit to consider when choosing a supplier.
