

**SITE: Epping Primary School**

**CUSTOMER: Farrans**

**PRODUCTS: Bespoke Roofing Panels**

Carter Concrete recently completed the design, manufacture and installation of sloping roof units for Epping Primary School.

The job entailed the design of bespoke units to incorporate a sloping effect in order to meet the demands of the client.

The units were then manufactured and delivered to site where they were installed by Carter Concrete installation teams.

The job was successful with a smooth installation achieved.
